Diagnostic Report

Report ID:	1
Scan Date:	2026-07-23 05:42:09
Health Score:	55.3/100 (Fair)
Scan Duration:	19s
Status:	Completed

System Information

Computer Name:	Dharaneesh-desktop
Platform:	Windows
OS:	10
Architecture:	AMD64
Processor:	AMD64 Family 25 Model 80 Stepping 0, AuthenticAMD

Health Score Summary

Overall Score: 55.3/100 - Fair

CPU Diagnostics

Usage:	17.2%
Average:	11.6%
Physical Cores:	6
Logical Cores:	12

Memory (RAM) Diagnostics

Usage:	93.5%
Total:	7.34 GB
Used:	6.86 GB
Available:	491.90 MB

Disk Diagnostics

Drive	Total	Used	Free	Usage
C:\	201.17 GB	157.78 GB	43.39 GB	78.4%
D:\	274.82 GB	195.56 GB	79.26 GB	71.2%

Network Diagnostics

Hostname:	Dharaneesh-desktop
Local IP:	10.136.174.37
Internet:	Connected
Latency:	N/A

Battery Diagnostics

Status:	Discharging
Charge:	32%
Plugged In:	No

Recommendations

1. High Memory Usage

Memory usage is high at 92.6%. The system may be using virtual memory (disk).

- Close unused applications
- Check for memory-hungry browser extensions
- Consider increasing virtual memory
- Run Disk Cleanup to free up resources

2. Battery Health Degraded

Your battery health has degraded. Consider replacement.

- Consider replacing the battery
- Monitor battery capacity
- Avoid keeping laptop plugged in constantly
